about us

firm laid its collaboration in 2010 with a clear perspective of achieving art & creating living, breathing spaces which could blend well with the environment with its individual identity.

adept is acknowledged as a thought leader in the country for its work in the domain of architecture and spatial design.

our work is grounded on the principles of conscious design, an approach that celebrates local resources, cultural influences, a keen attention to detail and an inclusive process. we follow an iterative and incremental methodology of innovation and root our learning in history and local context. we aim to craft benchmark solutions that address society's changing ways of living and working.

we explore ways to engage the user, the way they move through the space. we like taking design to an extremely conceptual stage. we find inspiration in ordinary things, everyday events and chance encounters.

the firm takes a deeply contextual approach to its work and combines this with a strong focus on the tactile and sensory qualities of the space. our design process looks at sustainability through the multiple lenses of cultural, social and environmental impact. there is an active engagement in integrating localized skills and resources with state-of-the art materials and technologies.

working in a highly collaborative environment, our team combines distinct strengths over multiple domains to shape master plans, buildings, interiors and related endeavors, which are at the cutting edge of design thinking.

bivek (architect & valuer)_founder

bachelor in architecture (b.arch), bbdnitm, lucknow university

member of council of architecture (coa)

member of Indian institute of architects (iia)

member of Indian institute of interior designers (iiid)

member of lucknow architects association (laa)

member of institute of valuers (iov)

“through aesthetics, i breathe life into walls, creating spaces that reflect both purpose and identity.”

this philosophy embodies bivek pal—a young, vibrant art connoisseur, space stylist, and product designer whose persona resonates through every space he curates. his creations are a thoughtful exploration of materials, where trending elements meet timeless traditions. by seamlessly blending diverse textures and forms, he crafts spaces that reflect his distinctive signature style.

bivek’s artistic sensibilities span the spectrum from modern minimalism to classic elegance, infused with a bold and remarkable chutzpah. every space he styles narrates a compelling story—one of grace, exuberance, contemporary sophistication, enduring charm, and captivating ethnicity. each project bears the mark of his design ingenuity, resulting in a unique and memorable identity.

driven by a vision to establish his own design label, bivek aspires to champion the idea of “art as an experience,” transforming environments into immersive expressions of creativity.

his journey has been shaped through collaborations with esteemed architectural firms such as fountainhead, gian p. mathur & associates, space designers international architects, modarch india, deepak mehta & associates, among others. this diverse exposure has refined his expertise across projects of varying scales, styles, and complexities.

our values

an attitude of gratitude

no matter what the scale or type of work – it is a privilege for us to work on a project. giving anything short of our best selves to our work is untrue to ourselves.

innovation as a way of life

innovation to us is a way of being; it is a practice that we bring in to work everyday. we believe that bold visions are a result of a continuous and relentless pursuit of the elusive state of perfection.

context is decisive

we are deeply aware that we create standing on the shoulders of others who came before us and those we have around us. an understanding therefore, of indigenous history and local context, in terms of both skill and material, is critical.

genius as an act of the collective

we celebrate individual excellence & accomplishment, while consciously fostering a culture of collaboration & mentorship, vesting each one of us in the success of the other.

we work best when individuals who are a part of the process contribute their slice of genius to it. our biggest triumphs are an act of co-creation.

learning for excellence

learning is an integral part of who we are. each one of us as individuals, and the organization as a whole, takes ownership of developing skills or attitudes that foster excellence — always looking to be out of our comfort zone and always open to change.

empowered people produce powerful work

our strength lies in our people. we are committed to create an environment that enables individuals to learn, grow and perform in a manner which empowers them — professionally and personally — where each individual is pushed to perform at their fullest potential.

honoring relationships & our word

we deeply respect our clients and their businesses, our collaborators, our vendors, our contractors, our team, our society and above all our planet. to this end we strive to bring out the best in each of these relationships. we are aware of the responsibility that we are entrusted with and do everything in our power to deliver exceeding expectations. above all, we honour our word, and are willing to be held accountable to it at all times.

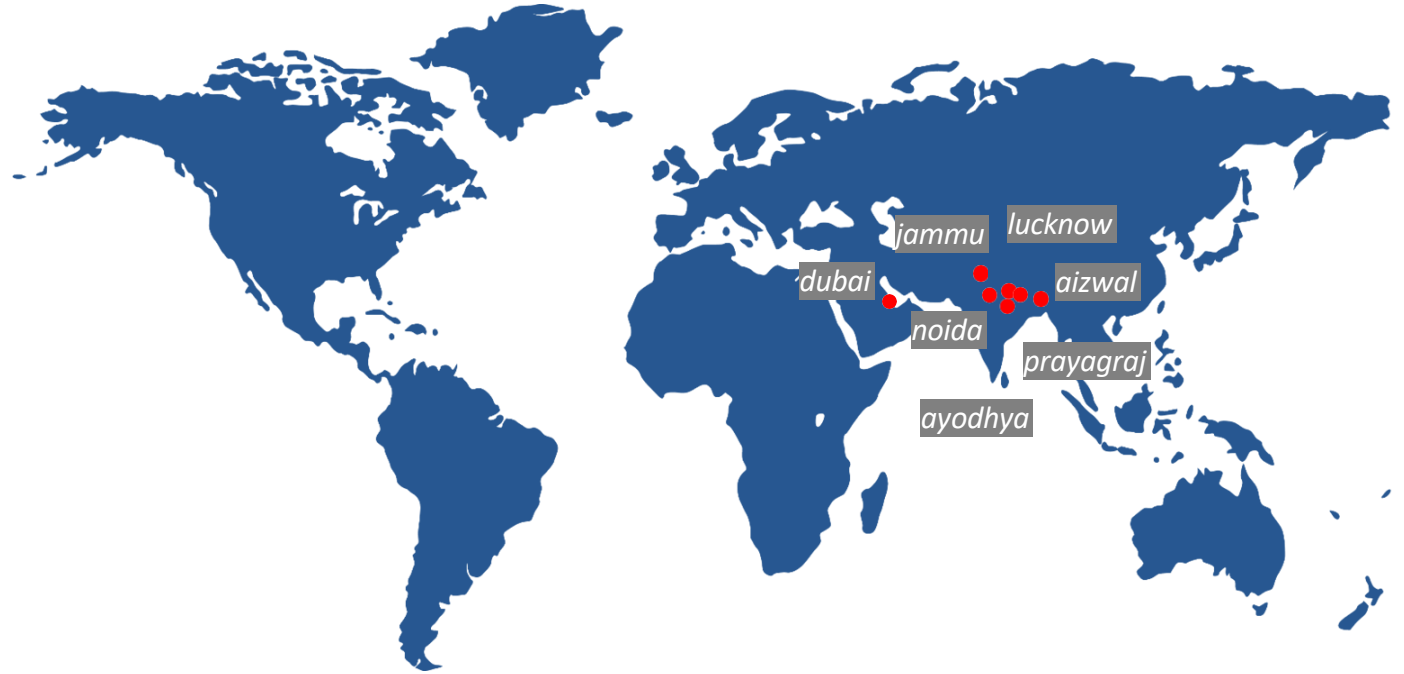

trust as a starting point

we fundamentally trust people. we believe that each person, given an opportunity, will want to be the best they can be and will act with integrity. our actions are consistent with this belief.

bring love to all we do

above all else, we believe that love supersedes all logic and use it as our guiding compass in the way we are and in all we do.

how we work

an attitude of gratitude

no matter what the scale or type of work – it is a privilege for us to work on a project. giving anything short of our best selves to our work is untrue to ourselves.

bring passion to all we do

above all else, we believe in passion as a governing principle that supersedes all logic and bring it as an overriding attitude to all we do.

honouring relationships & our word

we deeply respect our clients and their businesses, our collaborators, our vendors, our contractors, our teammates, our society and above all our planet. to this end, we strive to bring out the best in each of these relationships.

genius as an act of the collective

our process works best when each stakeholder contributes their slice of genius to a project – hence success is perceived as a collective accomplishment rather than an act of individual authorship.

how we price our effort

in general, architects charge in different ways i.e. as a percentage of the total construction cost or as a fixed fee with a stipulated sum or as a reflection of the number of hours needed to do the work. our professional fees will be directly proportional to the amount of work and project deliverables.

licensed architects

as we are registered licensed architects from council of architects, we charge by the norms set by council of architects.

fees/sq.ft. of build up area

we charge on rate per sq.ft. basis of your total built-up area. it is independent of your total building cost or your material specifications. we will work on the total fees structure right at the beginning of any project.

split payment mode

the total fees is split into different construction stages, again as mentioned by coa. this is to ensure that we give our deliverables and get the fees.

varied scope & work (depending on the scope of work, i.e;)

1. *only architecture design*
2. *architecture design + landscape design*
3. *interior design + architecture*
4. *master planning + landscape the professional fees may vary.*
5. *construction management*
6. *for small projects we work with fixed fees also.*

resources

adept is an international architectural group, working on a range of different projects from more than 15 years. thanks to our multidisciplinary associated partners of professionals, we provide services and expertise for projects of all scales and levels of complexity.

***selected project
(highlight)***

**volume for DIAZOMA
area = 12,000 sq.ft.**

architecture is not merely about creating a building—it is about creating an experience, an identity, and a lasting impression. this contemporary commercial design beautifully demonstrates how bold geometry, refined materials, landscape, and natural light can come together to create a truly memorable architectural destination.

the façade is defined by a series of dramatic sculptural volumes, creating a strong sense of movement and visual rhythm. the crisp white textured surfaces provide a sophisticated and timeless character, while the deep black architectural elements add contrast and emphasize the building's modern identity.

at the heart of the composition, the double-height glazed entrance acts as the focal point. its transparent façade visually connects the interior with the exterior, allowing warm interior lighting to glow through the structure and create an inviting atmosphere. the expansive glass also introduces a sense of openness, making the entrance feel grand without becoming overwhelming.

the carefully integrated landscape design further enhances the architecture. mature trees, manicured hedges, ornamental planting, and pedestrian-friendly plazas soften the strong geometry of the building while creating a comfortable arrival experience. the central landscape island and organized pedestrian movement add both functionality and visual balance.

from an architectural perspective, the project reflects a thoughtful dialogue between solid and void, light and shadow, transparency and mass. every element—from the vertical façade openings to the recessed entrance and projecting volumes—contributes to a cohesive contemporary composition.

*selected project
(highlight)*

*showroom interior, NYC
area = 7235 sq.ft.*

The installation unfolds as a curated sequence rather than a conventional display—an immersive landscape where product, material, and architecture are inseparable. Conceived as a porous grid, the pavilion uses a suspended lattice framework to dissolve rigid boundaries, allowing sightlines to extend diagonally across the space while subtly guiding movement. At its core, the design negotiates between solidity and lightness. Monolithic volumes in warm metallic finishes anchor the composition, acting as tactile backdrops to the refined sanitary elements. These are counterbalanced by the delicacy of the overhead mesh and vertical light tubes, which introduce a sense of levitation. The lighting is not merely functional; it becomes a spatial device—punctuating volumes, emphasizing verticality, and drawing the eye to moments of interaction. Materiality plays a critical role in constructing the experience. A palette of brushed copper, muted stone, and deep green marble establishes a dialogue between warmth and restraint. The basins and fixtures are presented almost as artifacts—placed on elevated plinths with generous negative space around them, reinforcing their sculptural quality. This intentional spacing allows each object to be read individually, yet within a cohesive visual language.

***selected project
(highlight)***

***atlantis heights, dehradun musoorie road
area = 4000 sq.mt.***

the building showcases a contemporary-arched aesthetic. it uses a sophisticated palette of charcoal grey, soft beige, and warm wood accents. the standout feature is the rhythmic use of arched balcony frames, which break up the linear geometry and give the facade a timeless, elegant character.

wide, glass-fronted terraces designed to maximize natural light and offer panoramic views of the surrounding greenery.

a gated, high-clearance driveway with integrated spotlights and a minimalist security kiosk, signaling exclusivity and safety.

the use of "vertical greenery" and vibrant purple bougainvillea on the perimeter walls softens the stone and metal structures, creating an "urban oasis" feel.

subtle cove lighting and facade uplighting enhance the building's silhouette, making it an architectural landmark even after sundown.

spread over an area of 8 acres, ssb pratham amar shaheed path, lucknow is one of the spacious housing societies in the lucknow region. with all the basic amenities available, ssb pratham fits into your budget and your lifestyle.

***selected project
(highlight)***

hotel veda, banglore
area = 5135 sq.mt.

a design philosophy that blends high-end urban living with the restorative power of nature. this mid-rise luxury development is a masterclass in "organic luxury," prioritizing light, air, and greenery within a sleek, metallic framework.

organic curves and warm tones unlike the cold, sharp angles of traditional skyscrapers, this building utilizes soft, rounded corners and a warm, copper-gold palette. the vertical bronze-toned fins provide both a rhythmic visual texture and functional solar shading, reflecting the golden hour light to create a glowing landmark.

integrated "living" balconies, the facade is punctuated by deep-set terraces overflowing with lush greenery.

the base of the building is defined by a massive, multi-story glass atrium. the interior features oversized crystal chandeliers that are visible from the street, signaling an uncompromising level of luxury and a seamless transition from the public realm to the private residence.

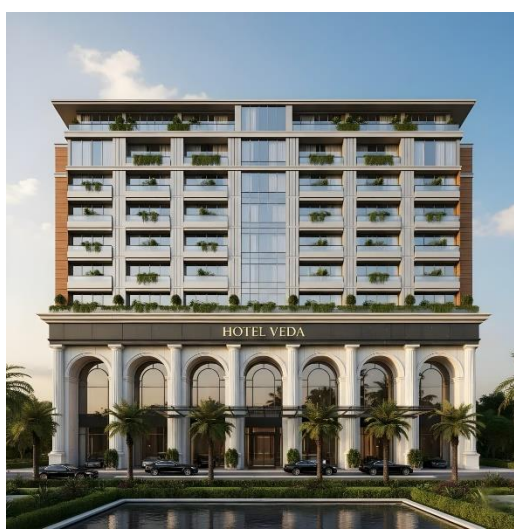

lifestyle & amenities:

rooftop oasis | an expansive, glass-walled crown likely housing a sky lounge or infinity pool with 360-degree views. |

| indoor-outdoor living | floor-to-ceiling glass walls ensure that every unit feels connected to the horizon. |

| curated landscaping | the ground-level plaza features sculptural art and manicured gardens, creating a "boutique hotel" arrival experience.

***selected project
(highlight)***

***hotel veda, gurugram
area = 3850 sq.mt.***

*"neoclassical modern fusion"
it balances grand, traditional elements at the base with a clean, contemporary residential/hotel structure above.
the ground floor features a striking series of ionic-inspired columns and high-arched glass windows, giving the entrance a sense of luxury and timelessness. above the podium, the design shifts to a modular, symmetrical grid. the use of glass railings and white framing creates a light, airy feel.
every floor incorporates integrated planter boxes, softening the stone and glass with natural textures and promoting a "biophilic" urban design.
the building communicates sophistication and tranquility. the name "veda" often refers to knowledge or wisdom in sanskrit, which aligns with the balanced, orderly, and peaceful aesthetic of the architecture. the warm wood-toned side panels provide a nice contrast to the cool white stone and dark charcoal signage band.*

***selected project
(highlight)***

***curve square mall, sri ganganagar
area = 3.91 acre***

crafting spaces that elevate the everyday. we poured our passion into designing this vibrant retail and lifestyle hub, envisioned as more than just a building – it's a place for community, commerce, and connection. notice how the natural light floods the interiors and the outdoor spaces invite lingering. great architecture isn't just about structure, it's about experience.

detailing the layers of a modern masterpiece. this project showcases our commitment to innovative façade design, sustainable integration of landscaping, and creating a memorable pedestrian experience. the interplay of solid and void, transparency and texture, was key to achieving this striking presence. a true testament to collaborative design and execution!

***selected project
(highlight)***

***cruise residences, indore
area = 4.35 acre***

cruise residences is envisioned as a landmark of contemporary luxury, where architecture, landscape and lifestyle come together in a seamless expression of refined urban living. inspired by the fluid elegance of a luxury yacht, the building is defined by its sweeping curves, layered balconies and sculptural form, creating a distinctive silhouette that feels both dynamic and timeless.

the architecture celebrates openness and connection with the outdoors. expansive glass façades allow natural light to enter the residences while offering panoramic views of the surrounding landscape and city. generous private balconies extend the living spaces outward, creating a continuous relationship between interior comfort and the open sky. the soft, flowing lines of the façade are complemented by carefully integrated greenery, giving the development a sense of calm and exclusivity.

more than simply a residential development, cruise residences represents a vision of architecture that transforms the idea of home. it is a place where contemporary design meets comfort, where luxury is expressed through space and detail, and where every day is designed to feel like a journey of exceptional living.

selected project (highlight)

future logistics, noida
area = 15000 sq.ft.

modern logistics, designed for the future.

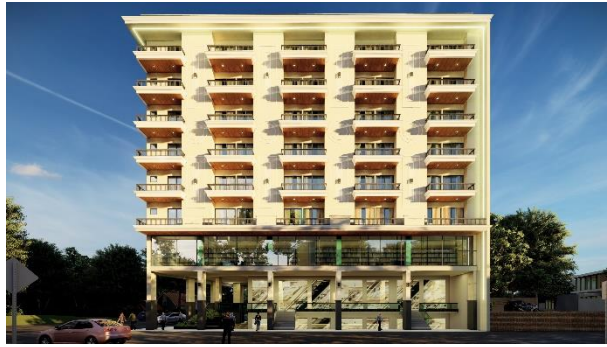

introducing a contemporary warehouse and logistics facility where functionality meets architectural excellence. this building is designed around the needs of modern logistics operations, combining high-performance industrial infrastructure with a clean, premium visual identity.

the white architectural façade creates a bright, sophisticated and highly recognizable presence, while subtle grey detailing adds depth and definition to the building envelope. large-format cladding panels, a dramatic glazed entrance and warm vertical architectural elements create a strong contrast between the industrial warehouse volume and the corporate reception space. at the heart of the design is a spacious multi-bay loading dock, planned to support efficient truck movement, loading and unloading operations. the generous hardstand area provides comfortable maneuvering space for heavy vehicles, while dedicated employee and visitor parking improves overall site circulation.

landscape elements have been integrated throughout the frontage to soften the large industrial mass and create a more welcoming arrival experience. the secure entrance gate, controlled access, perimeter fencing and carefully planned circulation further strengthen the site's operational efficiency and security.

the result is more than just a warehouse—it is a modern logistics destination built around efficiency, identity and long-term functionality.

***selected project
(highlight)***

***akshika residency, ghaziabad
area = 1600 sq.mt.***

designed with a nod to neo-classical aesthetics, the facade features majestic white columns and symmetrical geometry. the warm, wood-finished undersides of the balconies contrast beautifully with the crisp, ivory exterior, creating an inviting glow during the golden hour. a perfect blend of high-end retail spaces on the ground levels and luxury residential suites above. the commercial floors boast floor-to-ceiling glass, offering maximum visibility for businesses and a sleek, modern look. every residential unit is equipped with a spacious private balcony, designed to offer fresh air and panoramic city views. situated on a wide, accessible boulevard with ample parking and pedestrian-friendly access. a sanctuary of calm above the bustle, featuring premium finishes and an elite community atmosphere.

***selected project
(highlight)***

***natura vista, faizabad
area = 3.4 acre.***

"natura vista"

inspired by nature. designed for life.

natura vista draws inspiration from the elegance of botanical forms and the efficiency of natural systems. its structure, façade, and living spaces reflect the harmony, resilience, and beauty found in nature.

the structural façade pattern is inspired by leaf venation, optimized for strength and lightness.

the building's form and circulation follow the nautilus spiral, symbolizing growth and flow.

façade screens and shading devices inspired by honeycomb structure for light modulation and energy efficiency.

balcony edges and overhangs mimic the aerodynamic flow of bird wings, reducing wind impact and enhancing comfort.

***selected project
(highlight)***

***entrance gate for air force station, panchkula
(competition project for panchkula authority)***

this aerial perspective showcases a striking architectural entranceway, likely serving as a grand gateway to a community, corporate campus, or even a city. the design employs a bold, modern aesthetic characterized by strong geometric forms and a blend of materials.

the most prominent feature is the cantilevered canopy structure, spanning gracefully over a multi-lane roadway. its angled planes and linear elements create a sense of dynamic movement and lightness, despite its substantial size. the use of louvers or slatted elements on the underside of the canopy suggests a play with light and shadow, potentially designed to create interesting visual patterns on the road below.

adjacent to the main canopy, a more solid, angular building element rises, perhaps housing security, administrative offices, or a welcome center. its crisp lines and varying roof angles contribute to the overall contemporary feel. the combination of open and solid forms provides both visual interest and functional space.

the surrounding landscape design is integrated with the architecture, featuring neatly manicured green spaces, palm trees, and decorative elements that echo the modern theme. the circular paved area with red and white accents, combined with the radial arrangement of planting, creates an inviting focal point, guiding traffic flow and establishing a sense of arrival.

the wide, well-maintained roadways indicate a significant thoroughfare, and the vehicles present provide a sense of scale. the entire composition suggests a thoughtful approach to urban design, where infrastructure and architecture coalesce to create an impressive and functional entry experience.

***selected project
(highlight)***

***zee cooperative building, g. noida
(zee network)
area = 1.93 acre***

the project comprises two nearly identical, multi-story rectilinear blocks, each articulated with a prominent, white-framed u-shaped element that wraps around the upper levels. this striking architectural gesture creates a strong visual identity and anchors the building's top. the separation of the two towers opens up a significant central volume, fostering a sense of grandeur and providing a natural light well.

façade and materiality

the façade is predominantly composed of a high-performance glass curtain wall system, featuring a subtle blue tint that reflects the sky and surroundings, providing both aesthetic appeal and potentially contributing to solar control. this transparency maximizes natural light penetration into the interior spaces.

contrasting with the extensive glazing, elements of natural wood or wood-look cladding are strategically introduced, particularly in recessed areas and as accent panels, adding warmth and a tactile quality to the sleek, modern design. these elements are seen integrated with the large white frames, highlighting specific zones.

in essence, this project represents a sophisticated commercial typology that successfully marries contemporary aesthetics with functional planning, creating an iconic twin-tower complex with a strong emphasis on public interaction and environmental integration.

***selected project
(highlight)***

***executive office, gonda
(pwd)***

the office is organized into two primary functional zones: the work area (desk and seating) and the lounge/waiting area (sofa and accent wall), seamlessly connected within a single open volume. the design intent is clearly to create a space that is both visually impressive for receiving guests and highly functional for the occupant.

the selection of materials is crucial to the room's character:

wood paneling: a dominant feature is the vertical slatted wood paneling on the right wall, providing a rich, dark backdrop that introduces warmth and texture. this use of wood grounds the space and enhances acoustic quality.

marble flooring: the floor is clad in a white marble with grey veining, offering a sleek, modern contrast to the dark wood and leather.

lighting design and focal points

the lighting scheme is complex and layered, serving both functional and decorative roles:

cove lighting: recessed linear light strips in the ceiling perimeter provide soft, ambient illumination, emphasizing the clean lines of the dropped ceiling detail.

task/accent lighting: the built-in library shelving is dramatically backlit with warm led strips, turning the collection of books and artifacts into a curated, glowing focal point.

built-in library: the floor-to-ceiling shelving unit, framed in dark wood and glass, serves as both storage and a sophisticated display element, suggesting intellectual pursuits and providing a strong architectural anchor for the room.

furniture: the executive desk is large and monolithic with a dark, rich finish, clearly defining the power center of the room. the visitor chairs are designed with a low profile and curved, ergonomic backs, combining comfort with a modernist aesthetic.

*selected project
(highlight)*

**banquet cum restaurant, lucknow
(champaran)
area = 1800 sq.ft.**

a commercial building façade that adopts a neo-classical or beaux-arts inspired style, applying a traditional architectural vocabulary to a contemporary vertical structure, likely housing a restaurant and banquet facility.

the building stands tall against a backdrop of modern, high-density residential towers, highlighting the design's deliberate stylistic contrast. the foreground includes a basic streetscape and minimal, low-level foliage, grounding the otherwise ornate vertical mass into the urban environment. the integration of subtle lighting fixtures emphasizes the architectural details and entrance points during the evening.

***selected project
(highlight)***

showroom, lalganj
area = 2000 sq.ft.

a commercial building façade that adopts a neo-classical or beaux-arts inspired style, applying a traditional architectural vocabulary to a contemporary vertical structure, likely housing a restaurant and banquet facility.

the building stands tall against a backdrop of modern, high-density residential towers, highlighting the design's deliberate stylistic contrast. the foreground includes a basic streetscape and minimal, low-level foliage, grounding the otherwise ornate vertical mass into the urban environment. the integration of subtle lighting fixtures emphasizes the architectural details and entrance points during the evening.

***selected project
(highlight)***

***mini clinic, ludhiana
(taskar)
area = 1200 sq.ft.***

This design immediately establishes a strong brand identity through a high-contrast, modern aesthetic focused on maximizing product visibility and optimizing customer flow.

Dominant Feature: The massive, bright red feature wall is the immediate focal point upon entry, using the brand's primary color (Taskar Medicines) for powerful visual impact. This wall acts as a large-scale graphic and marketing billboard, setting the store's energetic tone.

Contrast: The intense red is dynamically balanced by clean white floors and ceilings, and muted light-grey walls, ensuring the products and the signage pop without visual clutter. The high-gloss white floor enhances the lighting and adds a sense of sterility and professionalism.

It's a retail architecture where strategic design choices (color, layout, lighting) are used to support brand goals, optimize product display, and enhance the customer experience.

***selected project
(highlight)***

**residence, cyprus
area = 7500 sq.ft.**

a stunning, large-scale private residence that embodies high-end contemporary architecture, distinguished by its dynamic volumetric composition, rich material contrasts, and intensive biophilic integration. the building is a complex, asymmetrical composition of intersecting rectilinear blocks, creating a sense of visual depth and layering. it utilizes dramatic cantilevers (such as the upper volume projecting over the main entrance) and deep recesses to define the façade. this volumetric play results in multiple shaded terraces and balconies, optimizing the building's interaction with light and climate. the overall form avoids a monolithic appearance, instead favoring a fragmented, sculptural aesthetic.

***selected project
(highlight)***

***residence, cyprus
area = 8700 sq.ft.***

a grand, symmetrical residential compound that marries neo-classical formality with contemporary tropical accents. the design creates a powerful sense of order, elegance, and balanced massing across the main house and its ancillary structures.

the main residence is defined by its strict central symmetry, anchored by a prominent, recessed entrance bay that rises through two stories. the overall massing is broad and horizontal, typical of a large villa or estate house. the structure is capped by a hip roof with a dark, heavy cladding (such as slate or dark shingles), providing a traditional, stabilizing element that contrasts with the lighter, modern walls below. this design successfully mediates between the formal language of classical architecture and the clean lines and material transparency of modern design, resulting in a sophisticated, well-proportioned residential statement suited for a stately, warm-climate setting.

***selected project
(highlight)***

***residence, lucknow
area = 5000 sq.ft.***

the design employs a neoclassical aesthetic, evidenced by its use of strong horizontal and vertical lines, a light, neutral color palette (predominantly white or pale gray), and formal, balanced composition. the villa is secured by a low-height but decorative metal fence set atop a substantial base, punctuated by large, classically-detailed piers. this boundary maintains privacy while allowing a visual connection to the property. landscaping, including palm trees and low-level shrubbery, is minimal but strategically placed to complement the structure's formality. the towering high-rise buildings in the background place this design within a dense, perhaps urban or suburban, mixed-use environment, making the villa a distinguished architectural statement within its context. this design successfully bridges traditional classical architecture with modern construction and sensibilities, resulting in a stately, opulent, and visually impressive residential structure.

***selected project
(highlight)***

***residence, sunderbani
area = 4800 sq.ft.***

the house is designed as an interlocking composition of stacked, rectilinear volumes. the lower levels establish a heavy, grounded base, while the upper floor features a dramatic cantilever, creating a deep overhang that shields the lower façade. this volumetric interplay generates complexity and visual interest. the composition is capped by a roof terrace with a pergola, extending the usable outdoor space. this residence is a rigorous study in material contrast and volumetric composition, achieving a powerful and luxurious statement through dark, grounded masses and light, transparent floating volumes.

***selected project
(highlight)***

residence, lucknow
area = 5000 sq.ft.

a sophisticated, multi-level private residence that exemplifies contemporary villa architecture with a strong emphasis on biophilic design. the building is a dynamic composition of intersecting volumes, rich material contrasts, and seamlessly integrated greenery, creating a harmonious blend of built form and natural elements. the residence is a complex arrangement of stacked and interlocking rectilinear volumes, creating deep recesses, dramatic cantilevers, and varied rooflines. this volumetric play results in a highly sculptural form, articulated by alternating projections and setbacks that define different functional zones. the overall massing suggests a generous program, likely accommodating multiple living areas, terraces, and private spaces.

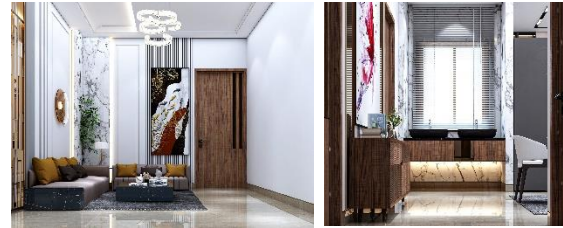

***selected project
(highlight)***

***residence, lucknow
Interior***

This luxurious living space masterfully blends modern aesthetics with functional design, creating an open yet clearly defined environment. Beyond the dividing screens, the dining area is visible, featuring a sleek dining table surrounded by modern chairs. The space is crowned by a captivating chandelier, echoing the contemporary design of the main living area's lighting fixtures. A vibrant, large-scale abstract artwork featuring a butterfly in shades of red and purple adds a dynamic splash of color and artistic flair to the dining space, visible from the living room.

Overhead, a series of contemporary circular chandeliers provides ample, diffused lighting, enhancing the room's airy and sophisticated ambiance. The consistent use of warm metallic accents throughout, from the screen dividers to the lighting fixtures and decor, ties the entire design together, creating a cohesive and exceptionally refined interior.

***selected project
(highlight)***

hotel cum banquet, lucknow
area = 10000 sq.ft.

a showcase two distinct architectural compositions: a modern, luxurious residential/commercial interior and a contemporary hotel facade. both exhibit careful attention to material, lighting, and spatial definition.

open-concept with defined zones: the space operates on an open-concept plan, yet the living area is clearly segregated from the dining area by a pair of tall, vertical metal lattice screens finished in a warm gold/brass tone. this element is crucial, offering visual porosity (allowing light and glimpses through) while maintaining spatial definition, which is a classic architectural technique for breaking up large, continuous spaces.

axis and view: the main axis of the space leads the eye from the living room across the metallic dividers toward the dining area, which is highlighted by a dramatic, colorful artwork. this establishes a visual hierarchy and a clear focal point within the secondary zone.

facade cladding: the main exterior surface is a smooth, light-colored material (white or light grey composite panel or stucco), providing a clean, contemporary canvas.

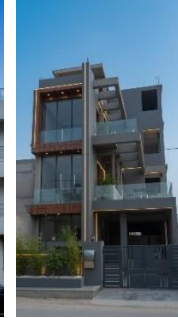

glass and openings: large expanses of glass curtain wall are utilized, especially on the lower floors, to offer maximum visibility into the lobby and commercial spaces. the upper floors feature a more traditional pattern of smaller, recessed rectangular windows.

TOMORROW

Design That Shapes A Better Future

CRUISE RESIDENCES

WHERE ARCHITECTURE
MEETS ASPIRATION

📍 INDORE

Rising gracefully in the heart of Indore, Cruise Residences is a landmark address that redefines refined living. Inspired by the poetry of ocean liners, its fluid form, layered terraces, and panoramic vistas offer a lifestyle that is both iconic and deeply personal.

🌊 ICONIC ARCHITECTURE

A sculptural form that makes a bold statement on the skyline—where elegance meets engineering.

RESORT-STYLE LIVING

Curated amenities and world-class facilities for everyday indulgence.

CRAFTED FOR LUXURY

Premium materials and meticulous attention to every detail.

CONNECTED TO NATURE

Landscaped decks, sky gardens, and open spaces that create a serene connection with nature.

26

ARCHITECTURE

Sculpting a New Skyline in Indore

Cruise Residences is more than a home—it's a statement of refined living. Designed by ADEPT, the project embodies innovation, elegance, and a deep sensitivity to its environment.

Inspired by the fluidity of ocean liners, the architecture features sweeping curves, layered terraces, and a dynamic silhouette that stands out on Indore's skyline. Every line, balcony, and detail is crafted to offer panoramic views, abundant daylight, and a sense of openness.

The design harmonizes luxury with nature. Landscaped podiums, infinity-edge pools, and open leisure decks create a resort-style experience, while sustainable strategies and thoughtful planning ensure comfort for generations to come.

Inside, expansive residences are defined by space, light, and sophistication. Floor-to-ceiling glass, premium finishes, and seamless indoor-outdoor connections elevate everyday living into an extraordinary experience.

“

We envisioned a landmark that brings the spirit of luxury resorts into everyday urban living.

Ar. Bivek,
Principal Architect of ADEPT

THE ADEPT DIFFERENCE

At ADEPT, we believe great architecture is born from insight, crafted with precision, and built to inspire. Our approach is rooted in a deep understanding of people, place, and purpose. We create spaces that balance aesthetics, functionality, and sustainability—delivering enduring value and elevated lifestyles.

PEOPLE CENTRIC

Designing spaces that enhance well-being and community.

CONTEXT RESPONSIVE

Sensitive to place, culture, and the surrounding environment.

INNOVATIVE BY DESIGN

Pushing boundaries with thoughtful innovation.

SUSTAINABLE FOR TOMORROW

Responsible design for a better and greener future.

RESORT-STYLE AMENITIES

Infinity pools, sun decks, and lush landscapes designed for relaxation and leisure.

SPACES THAT BREATHE LUXURY

Expansive layouts, natural light, and timeless interiors that define sophistication.

ELEVATED EXPERIENCES

Sky gardens, lounges, and panoramic viewpoints that connect you to the beauty of Indore.

ADEPT STUDIO

ADEPT

Architecture & Interior Design Studio

Designing spaces. Enhancing lives.

At Adept, we craft thoughtful, functional and timeless spaces that reflect your vision and elevate the way you live, work and experience the world.

We are a multidisciplinary architecture and interior design studio delivering end-to-end solutions across residential, commercial and hospitality projects. Every project we take on is approached with creativity, technical excellence and a commitment to detail—ensuring spaces that are not only beautiful, but also meaningful and enduring. From the first sketch to the final handover, we partner with our clients at every step to transform ideas into built realities.

OUR CORE VALUES

Context First

We respond to site, culture and climate to create spaces that belong.

People Centered

We believe for how you live, work and feel—balancing beauty with everyday functionality.

Detail Driven

We believe in craftsmanship, quality and intention in every detail.

Enduring Design

Timeless spaces that adapt and age beautifully, built to last for generations.

Integrity Always

Honest process, clear communication and a commitment to doing what's right.

ABOUT ADEPT

At Adept, we believe great design is more than aesthetics—it's about purpose, people and place. Our work is a reflection of our core values: clarity, creativity and commitment. From concept to completion, we collaborate closely with our clients to shape environments that inspire and endure. We design with empathy, plan with precision and build with responsibility—creating spaces that are functional, inclusive and deeply connected to the people who experience them.

WHAT WE DO

- Architecture Design
- Interior Design
- Space Planning & Design Development
- Turnkey Project Execution
- Furniture, Styling & Custom Design

OUR SERVICES

We offer end-to-end solutions tailored to your vision.

- Concept Design
- Architectural Drawings & 3D Visuals
- Interior Design & Material Selection
- Project Management
- On-site Execution & Quality Control
- Furniture & Décor Procurement
- Styling & Art Curation
- Post-Completion Support

OUR LOCATIONS

We are proud to be based in three dynamic locations, allowing us to collaborate across boundaries and create meaningful spaces worldwide.

📍 Lucknow India | 📍 Noida India | 📍 UAE Dubai

OUR APPROACH

“Good design is not just what it looks like, it's how it makes you feel.”

— Ar. Bivek
Founder, ADEPT

Ar. Bivek
Founder, ADEPT

With a vision to create spaces that are both meaningful and timeless, Ar. Bivek founded Adept to bring a thoughtful approach to design—one that balances creativity with functionality and aesthetics with purpose.

ARCHITECTURE OF VOLUME

A dialogue between mass, void
and movement.

*"Volume is not simply the physical
mass of a building; it is the experience
created by how solids, voids, light
and movement come together."*

DESIGN APPROACH

This façade is conceived as a composition of bold architectural volumes. The sculptural vertical planes establish a strong rhythm while the recessed glazed entrance creates a contrasting void at the heart of the composition. The result is an architecture that feels solid yet open, monumental yet welcoming.

VOLUME & FORM

The primary volumes rise as distinct masses, creating depth through projection and recession. Their angled geometry introduces visual movement and gives the façade a dynamic silhouette. The central transparent volume acts as a spatial hinge, connecting the exterior public realm with the interior.

MATERIAL & LIGHT

The textured light-toned envelope provides visual weight and continuity, while deep reveals and dark framing emphasize shadow lines. Warm interior illumination transforms the central void into a luminous focal point, strengthening the perception of depth after dusk.

ADEPT PHILOSOPHY

At ADEPT, architecture is approached as a balance of proportion, material, light and human experience. We create spaces where form has purpose and every volume contributes to identity, function and atmosphere.

BIO MIMICRY IN DESIGN

INSPIRED BY NATURE. DESIGNED FOR LIFE.

Natura Vista draws inspiration from the elegance of botanical forms and the efficiency of natural systems. Its structure, façade, and living spaces reflect the harmony, resilience, and beauty found in nature.

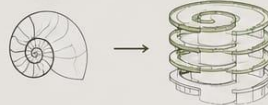

1. LEAF VEINS

The structural façade pattern is inspired by leaf venation, optimized for strength and lightness.

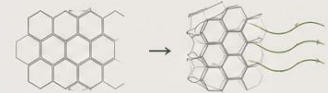

2. NAUTILUS SHELL

The building's form and circulation follow the nautilus spiral, symbolizing growth and flow.

3. HONEYCOMB

Façade screens and shading devices inspired by honeycomb structure for light modulation and energy efficiency.

4. BIRD WINGS

Balcony edges and overhangs mimic the aerodynamic flow of bird wings, reducing wind impact and enhancing comfort.
